mechanical engineering courses.

The Engineering Department currently offers Mechanical, Computer, Electrical, and Civil Engineering undergraduate degrees. The Mechanical Engineering program at UVU was established two years ago to help fill the growing demand for professionally trained engineers in the Orem/Provo greater metropolitan area, commonly referred to as the Silicon Slopes and regularly listed as one of the healthiest cities in the United States. UVU is a public university that offers a number of highly competitive benefits, while being located next to some of the best outdoor activity areas and national parks.

A successful candidate will teach students to understand and appreciate mechanical engineering topics, while fostering a commitment to lifelong learning. Design courses and prepare instructional materials. UVU prides itself on a student-centered learning environment and helping students succeed. Faculty are expected to assess teaching results and apply results to improve courses, curriculum, and teaching effectiveness.

The selected candidate will support department, university and the community through service such as committees and special projects, while fully supporting the university and program level accreditation efforts. All faculty are required to engage in scholarly activities, including research and keeping current in the latest developments in the field.

Utah Valley University prides itself on fostering an environment that values and promotes diversity and inclusivity. The UVU Engineering Department is committed to serving the greater Orem community and ensuring the classroom is inclusive for all people. As such, female and underrepresented minorities are especially encouraged to apply.

Required Qualifications:

B.S. and PhD in Mechanical Engineering, or closely related areas with emphasis in Materials (Composites), Manufacturing, or Design. (PhD must be completed by start date.)

Knowledge, Skills and Abilities:

- * Knowledge of instructional strategies and techniques, student management, motivation, evaluation and assessment of instruction, curriculum development, program development and evaluation, current trends in technical education, cooperative work experience programs, and student recruitment.
- * Knowledge and experience with supervision of undergraduate or industrial research projects.
- * Skills in interpersonal, problem solving and decision-making.
