Job Title	NASA-CAMEE Postdoctoral Researcher
Department	Mechanical Engineering
Institution	University of Texas, San Antonio San Antonio, Texas
Date Posted	Sep. 30, 2019
Application Deadline	Open until filled
Position Start Date	Available immediately
Job Categories	Post-Doc
Academic Field(s)	Ocean Engineering Mechanical Engineering Aerospace/Aeronautical/Astronautics
Apply By Email	kiran.bhaganagar@utsa.edu

Job Description

The newly NASA funded Center for Advanced Measurements in Extreme Environments (CAMEE) is looking for a highly qualified candidate for a postdoctoral research position, for a one-year appointment, which can be extended to 2 years depending on performance. The position is available immediately. Ph.D. from Mechanical Engineering, Geosciences, Atmospheric or Oceanic Sciences or related areas is preferred.

The candidate is expected to have excellent programming skills, familiarity with turbulence simulation, large scale models such as Atmosphere, WRF or ocean models. The job involves developing coupled Atmospheric/Ocean/Polar sea ice models, data analytic tools. Knowledge of CFD, Fluid Dynamics, experience working with models (either Atmosphere or Ocean) is required, and knowledge of python and deep learning algorithms is preferred. The candidate will be working with researchers from UTSA, UCLA (Los Angeles), University of Colorado, Boulder, and NASA centers (JPL, GSFC). The researcher will have access to state-of-the-art supercomputing facilities, field measurements and data. Job duties including conducting original research, model development, writing academic manuscripts.
