**Job Title** The LIINES (Laboratory for Intelligent Integrated Networks of  
Engineering Systems) at the School of Systems and  
Enterprises

**Department**

**Institution** Stevens Institute of Technology  
Hoboken, New Jersey

**Date Posted** Nov. 29, 2023

**Application Deadline** Open until filled

**Position Start Date** Available immediately

**Job Categories** Post-Doc

**Academic Field(s)** Ecological and Environmental  
Civil Engineering  
Engineering - Other

**Job Description**

**Job Description**

This postdoctoral research position is funded by a recently award project entitled: Collaborative Research: GCR: Convergent Anthropocene Systems (Anthems) - A System-of-Systems Paradigm. The project will develop a systems-of-systems (SoS) convergence paradigm that includes an SoS

computational framework, an SoS decision support system, and an SoS pedagogy, enabling diverse stakeholders to integratively address the suite of societal challenges of the Anthropocene (e.g., climate change and impacts, renewable energy, adaptive infrastructure, disasters, pandemics, food insecurity, biodiversity loss) and catalyzing a major transformation in our national and global approach to science and engineering. We will develop, implement, and validate our SoS convergence paradigm in close collaboration with the Chesapeake Bay Program (CBP), focusing on the Chesapeake Bay Watershed (CBW) region. The CBP is a consortium of governmental and non-governmental entities that manage the CBW, and through their committee structure and outreach provide an avenue for effective stakeholder engagement. The CBW is home to over 17 million people and the CBP stakeholder community needs integrated modeling tools to examine synergies (e.g., nutrient reduction and flood risk mitigation) and tradeoffs (e.g., nutrient reduction and fish productivity) across multiple systems. Together, the CBW and the CBP provide a real-world testbed for the SoS convergence paradigm, enabling us to bring together intellectually-diverse researchers to address multiple interdependent societal challenges (eutrophication, food and agriculture, and economic growth) by integrating across multiple systems (watershed, land use, economic, estuary and governance) and multiple disciplines (environmental engineering, city and regional planning, planning policy and design, civil engineering, geography, industrial and systems engineering, political economy and public policy).

## Department

School of Systems and Enterprises

## General Submission Guidelines:

Please submit an online application to be considered a candidate for any job at Stevens. Please attach a cover letter and resume with each application. Other requirements for consideration may depend on the job.

## Academic Submission Guidelines:

Please submit:

- Cover letter
- Curriculum vitae
- Research statement
- Teaching statement that includes a) teaching interests, b) teaching philosophy, and c) a plan on how to create an inclusive environment for students of all backgrounds in terms of classroom teaching, student advising, and graduate student mentoring
- Contact info for at least 2-3 references (school-specific; please refer to job posting)
