Job Description	

The [Department of Family Medicine](#) is seeking a highly motivated and qualified individual for a human factors postdoctoral research position focused on Medication Safety during Care Transitions. The successful candidate will hold a Ph.D. in Human Factors Engineering or a closely related field, demonstrating expertise in qualitative research methods. This position is funded by an NIH R18 grant, and the incumbent will play a key role in planning and executing research projects that will identify and address medication safety problems during care transitions.

Duties and responsibilities:

- Assist in the development and implementation of research plans.
- Collaborate with interdisciplinary teams to ensure the successful execution of research objectives.
- Stay abreast of relevant literature and contribute innovative ideas to enhance the quality and

impact of grant submissions.

- Contribute to the development and writing of grant proposals for extramural and/or intramural funding.
- Presenting research plans/results to faculty, students, collaborators/partners, and community stakeholders.
- Prepare and disseminate research findings through publications in peer-reviewed journals and presentations at conferences.
- Collaborate with team members to create reports, articles, and other documents for diverse audiences.
- Attend seminars and meetings related to the research project.
- Assist in training and mentoring of graduate, undergraduate, and other scientific staff.
