Job Description

The Haiqing Lin research group is performing breakthrough research focused on the synthesis and characterization of polymeric membranes for gas separation and water purification. The position is available immediately with a term of one year and may be extended for an additional year based on satisfactory progress.

The candidate will:

- develop membranes for post combustion carbon capture
- synthesize and characterize polymers and/or metal organic frameworks
- prepare and characterize thin-film composite membranes
- prepare presentations, reports, and manuscripts
