as machine learning, deep learning, data science, medical imaging, and computer-aided diagnosis. The role involves supervising undergraduate and master's students, thereby contributing to their academic and professional growth. This role involves also efficient project management from concept to execution, ensuring impactful outcomes and sustainable value creation in the healthcare sector.

The ideal candidate will demonstrate exceptional ability to establish and maintain strategic partnerships, develop and negotiate funding proposals, and lead the promotion and participation in R&D projects, aiming to maximize impact and innovation in healthcare. Managing a portfolio of funded projects, valorising research findings, and active interaction with key stakeholders, including companies, hospitals, and academic institutions, will be critical components of this position

Academic Qualifications

MSc in Biomedical Engineering or equivalent

Minimum profile required

The candidate must have robust skill set in programming (e.g., Python) and experience with various imaging modalities, notably CT, but also including X-Ray and ultrasound

Preference factors

Experience in business development in the health domain and consortium management

Application Period

Since 19 Mar 2024 to 02 Apr 2024
