Key Responsibilities:

- Develop machine learning approaches to predict intercalation and fracture in epithelial cell tissue
- Generation of synthetic data via an in-house code
- Analysis of synthetic and experimental data
- Investigation of the convergence dynamics of machine learning algorithm
- Investigation of the influence of noise in the input data
- Collaborate with computational and experimental colleagues to interpret the results

Job Requirements:

- Bachelor Degree in Physics or Engineering
- Experience with numerical packages, C++ and Python
- Basic knowledge of deep neural network
- Able to work in interdisciplinary research environment
-
