<b>Job Description</b>	

The School of Chemistry, Chemical Engineering and Biotechnology (CCEB) invites applications for the position of Research Fellow.

The Research Fellow's role is primarily to execute project in a multidisciplinary team, aiming to perform experimental measurement to optimize the two-phase flow in trickle-bed reactors. Liquid distributions,

pressure drop, heat and mass transfer properties will be evaluated under various operating conditions.

**Key Responsibilities:**

- Perform experimental studies on trickle bed reactors
- Provide effective design solutions to optimize the reactor performance
- Develop new methods and techniques for measurement reactor performance
- Perform technical design reviews and recommend improvements
- Prepare manuscripts, reports and presentations
- Guide and train students and junior lab members
- Maintain complete documentation for experimental measurement methods and analysis used
- Regular communications with supervisors on experimental progress and report writing

**Job Requirements:**

- PhD degree in chemical engineering or closely related field
- Background in process engineering
- Good understanding of the scientific and engineering principles

We regret that only shortlisted candidates will be notified.
