world and ranks 4th in the field of Electrical & Electronic Engineering in the 2021 QS World University Rankings by Subjects.

EEE is inviting applications for the position of Research Assistant. The Research Assistant will work on a project to conduct the investigation on development of ingestible robotic system to enable continuous monitoring of disease relevant biomarkers and decision-making for on-demand delivery of therapeutics in the gastro intestinal tract in a non-invasive and automated manner. Novel sensors and actuators as well as their circuit design interface and algorithms for will be investigated.

Key Responsibilities:

- Development of circuit for implementing FPGA and microcontroller for implementing edge computing in ingestible/implantable electronics.
- Development of AI accelerator for encryption of wireless communication in medical electronics.

Job Requirements:

- Bachelor in Electrical and Electronic Engineering, Computer Engineering, or related field
- Expertise in embedded system and FPGA
- Knowledge in interfacing circuit design for low power sensing and wireless communication
- Experiences in biosensors and actuators for biomedical applications are highly preferred
-
