The Research Fellow will work on a project to conduct the research on development of distributed security control algorithms for complex and nonlinear cyber-physical systems.

Key Responsibilities:

- Conduct advanced research in the field of automatic control and security control of nonlinear cyber-physical systems.
- Develop and implement novel control strategies for nonlinear cyber-physical systems.
- Publish research findings in high-impact journals and present at leading conferences.
- Contribute to the preparation of research proposals and project reports.

Job Requirements:

- PhD in Mechanical and Automation Engineering, Electrical and Electronic Engineering, or a closely related field.
- Strong expertise in automatic control and nonlinear systems control.
- A high level of self-motivation and the ability to take initiative independently.
- A strong publication track record in relevant fields is advantageous.
-
