offshore wind turbines, the quality of the surrounding water and gas distribution systems.

This grant is intended to support the manufacturing of the various sensors to be developed, for testing and implementation in an industrial environment.

Academic Qualifications

Have completed a Bachelor's Degree or Professional Technical Course in Electrical/Electronic Engineering or equivalent

Minimum profile required

Advanced knowledge in:- Analog and digital electronics;- Programming languages;- Microcontroller programming, data analysis, communication and control.

Preference factors

Knowledge of optoelectronic systems. Experience in CAD design and 3D printing for prototyping.

Application Period

Since 27 Jun 2024 to 09 Aug 2024

Centre

Applied Photonics

Scientific Advisor

[Luís Carlos Coelho](#)

What we offer

- **Multicultural and collaborative environment**
- A multicultural, international and collaborative environment that makes it easier to exchange ideas, work in networks and create synergies.
- **International projects**
- The possibility of working in international projects with some of the most important companies in the field.
- **Mentoring**

- Mentoring with the best researchers in the fields of electrical and industrial engineering, bioengineering, information technology and physics.
- **Self Improvement**
- The possibility of participating in international conferences, workshops, seminars and vocational training.
- **Other Benefits and Perks**
- Flexible working time, health insurance, discounts in hotels, transportation, etc.
- **Informal Events**
- Annual informal events, such as the multicultural party.
