Position description

This Junior/Assistant Specialist position is for the Clark Lab in the California Institute for Quantitative Biosciences at the University of California. The Clark Lab develops microfluidic and molecular methods for the high throughput analysis of single cells. We use these techniques to study HIV latency in CD4 T cells and profile cellular interactions during central nervous system inflammation.

The successful candidate will assist PhD and postdoc researchers with wet lab experiments including the generation of Illumina sequencing libraries, single-cell RNA-seq experiments, and routine laboratory operations.

Responsibilities:

- Perform tissue culture, iPSC differentiation, and single-cell sequencing.
- Assist in routine laboratory maintenance and ordering,
