**Senior UVEX Systems Engineer (0546U), Space Sciences Laboratory - 65459**

About Berkeley

At the University of California, Berkeley, we are committed to creating a community that fosters equity of experience and opportunity, and ensures that students, faculty, and staff of all backgrounds feel safe, welcome and included. Our culture of openness, freedom and belonging make it a special place for students, faculty and staff.

The University of California, Berkeley, is one of the world's leading institutions of higher education, distinguished by its combination of internationally recognized academic and research excellence; the transformative opportunity it provides to a large and diverse student body; its public mission and commitment to equity and social justice; and its roots in the California experience, animated by such values as innovation, questioning the status quo, and respect for the environment and nature. Since its founding in 1868, Berkeley has fueled a perpetual renaissance, generating unparalleled intellectual, economic and social value in California, the United States and the world.

We are looking for equity-minded applicants who represent the full diversity of California and who demonstrate a sensitivity to and understanding of the diverse academic, socioeconomic, cultural, disability, gender identity, sexual orientation, and ethnic backgrounds present in our community. When you join the team at Berkeley, you can expect to be part of an inclusive, innovative and equity-focused community that approaches higher education as a matter of social justice that requires broad collaboration among faculty, staff, students and community partners. In deciding whether to apply for a position at Berkeley, you are strongly encouraged to consider whether your values align with our [Guiding Values and Principles](#), our [Principles of Community](#), and our [Strategic Plan](#).

At UC Berkeley, we believe that learning is a fundamental part of working, and our goal is for everyone on the Berkeley campus to feel supported and equipped to realize their full potential. We actively support this by providing all of our staff employees with at least 80 hours (10 days) of paid time per year to engage in professional development activities. To find out more about how you can grow your career at UC Berkeley, visit [grow.berkeley.edu](http://grow.berkeley.edu).

## Departmental Overview

The Space Sciences Laboratory (SSL) is an Organized Research Unit (ORU) of the Berkeley campus reporting to the Vice Chancellor for Research. SSL's primary goal is to foster research in space-related sciences and to provide education for the next generation of space scientists. Research at SSL, led by Berkeley faculty and SSL Senior Fellows, focuses on experiments and observations carried out in space as well as theoretical and basic research.

## The Role

SSL is looking for a Systems Engineer to join the UVEX project. The Ultraviolet Explorer (UVEX) is NASA's next Astrophysics Medium-Class Explorer mission. UVEX will undertake a synoptic survey of the entire sky in the near-UV and far-UV, probing the dynamic universe with a sensitivity more than 50 times better than GALEX. SSL will manage the UVEX mission including providing Project Systems

Engineering. The successful candidate will join this team and contribute to the development of this exciting new space based telescope. Experience in Systems Engineering is required and with another science focused NASA mission is preferred. Applicants should have a speciality in a technical domain such as optical design, RF engineering or mechanical systems. UVEX has only just been selected and there is an opportunity to join a project at the formulation stages. Candidates with strong technical and hands on skills are encouraged to apply.

### **Application Review Date**

The First Review Date for this job is: July 2, 2024

### **Responsibilities**

- Provides professional engineering information and advice to UVEX Project Systems Engineer and management in area of Systems Engineering.
- Consults and collaborates with the UVEX Principal Investigator (PIs), scientists and engineers to design the UVEX spacecraft.
- Carries UVEX system engineering responsibility covering relevant engineering specialties engaged at the mission level.
- Develops specifications for UVEX parts procurements; works with other research organizations in the development of the component.
- Coordinates work at other research institutions and reports to NASA technical review teams.
- Designs Systems and Ground Support Equipment where needed for the UVEX program.
- Performs the recording and reduction of test data for UVEX design and evaluation purposes.
- Gathers, analyzes and prepares information and reports with respect to feasibility, engineering design criteria, and performance of their components for the UVEX missions.

### **Required Qualifications**

- Thorough skills in the design, development, and construction of space systems, including one successful aerospace product.
- Specialist in at least one discipline
- Thorough systems knowledge of all engineering specialties in order to integrate at the mission level.
- Thorough skills in supervising lower-level professional engineering and technical staff to ensure objectives are met in adherence to quality standards.

### **Education / Training Requirements**

- Advanced degree in related area and / or equivalent experience / training

### **Preferred Qualifications**

- Post-graduate level course work in related area preferred.

### **Salary & Benefits**

For information on the comprehensive benefits package offered by the University, please visit the University of California's [Compensation & Benefits](#) website.

Under California law, the University of California, Berkeley is required to provide a reasonable estimate of the compensation range for this role and should not offer a salary outside of the range posted in this job announcement. This range takes into account the wide range of factors that are considered in making compensation decisions including but not limited to experience, skills, knowledge, abilities, education, licensure and certifications, analysis of internal equity, and other business and organizational needs. It is not typical for an individual to be offered a salary at or near the top of the range for a position. Salary offers are determined based on final candidate qualifications and experience.

The full pay scale for this position is \$117,000.00-\$226,000.00.

### **How to Apply**

To apply, please submit your resume and cover letter.

### **Conviction History Background**

This is a designated position requiring fingerprinting and a background check due to the nature of the job responsibilities. Berkeley does hire people with conviction histories and reviews information received in the context of the job responsibilities. The University reserves the right to make employment contingent upon successful completion of the background check.

### **Equal Employment Opportunity**
