Posted Jul. 12, 2024, set to expire Nov. 13, 2024

The Department of Civil and Environmental Engineering (CEE) at Tennessee Tech University invites applications for a Lecturer in Construction Engineering and Management. This is a full-time, nine-month, non-tenure-track position to begin January 1, 2025, and renewable based on satisfactory annual reviews, the needs of the department, and future funding.

Tennessee Tech University is classified as a doctoral university-high research activity (R2) institution located in the scenic Upper Cumberland Plateau, along Interstate I-40, between Nashville and Knoxville, and within close proximity to many state and national parks. With more than 2,600 students, the College of Engineering is Tennessee Tech's largest college and is experiencing significant growth. Construction of the 100,000 square foot Ashraf Islam Engineering Building will be complete in summer 2024. This building will house state-of-the-art environmental engineering and water resources labs, in addition to a unique living, outdoor environmental laboratory. The building is fully instrumented as a smart building for live monitoring and analysis. Furthermore, construction of the 80,000 square foot Advanced Construction and Manufacturing Engineering building, which will house laboratories for advanced high bay structural testing, concrete materials and soils testing, and mechanical behavior of materials testing, is slated to begin fall 2024. The CEE department is home to approximately 330 undergraduate and 20 graduate students with 12 full-time faculty. The CEE department also house the Center for Construction and Building Information Modeling. More information about the new buildings and department can be found at <https://www.tntech.edu/engineering/news/watchusgrow.php> and <http://www.tntech.edu/cee>.

The successful candidate will be responsible for developing and teaching undergraduate courses in Construction Engineering and Management in addition to service to the department, university, and profession. The individual will also serve as a liaison between the department and the construction industry.

**Minimum Qualifications:** Master's degree from an accredited institution in civil engineering, construction engineering, or a closely related engineering field OR a master's degree with a bachelor's degree in civil or construction engineering. Excellent written and oral communication skills. Applicants must be authorized to work in the United States without the University's sponsorship.

**Preferred Qualifications:** Ph.D. in Civil or Construction Engineering (or related engineering field) with at least three years of full-time experience and decision-making responsibilities in the US construction industry; Professional Engineer (PE) licensure or ability to obtain within 3 years; experience with Building Information Modeling (BIM); experience and excellence in teaching in higher education.
