Job Responsibilities

- Design and teach labs & practice modules.
- Mentor students in Capstone Projects and the Integrated Work Study Programme (IWSP).
- Lead or co-lead innovation projects with industry.
- Manage labs and equipment to support academic programmes and applied research.
- Ensure safety in labs

Job Requirements

- A Postgraduate Degree in Computer Science, Data Science, or a related field, or equivalent levels of industry experience.
- Proven working experience related to Machine Learning or AI, with good knowledge of industry practices and technological applications in the field. Familiarity with practical ML, including standard frameworks and libraries.
- Basic to advanced level competence in programming languages such as C/C++, Python and Java. Should be able to handle OOP.
- Good grasp and understanding of data structures, data modelling and software architecture as well as a firm competence in mathematics.
- Motivation to be involved in applied research and academic project work, with demonstrated ability in developing software solutions to technical problems.
- Proven supervisory skills and the ability to work well with others.
