regular meetings to maintain progress toward the lab vision.

Leads research and development projects requiring the applications of professional engineering or scientific practices and principles. Secures funding for the lab based on current and future research trends within the specific lab focus.

Interfaces with US Government, industry, faculty, staff, and students with a focus on relevant applied research. Develops proposals, budgets, schedules, and progress reports and presents results to internal or external stakeholder.

Advises faculty, principal research scientists and engineers, postdoctoral fellows, students, and staff with design, modification, prototype, processes, analysis procedures, and other engineering solutions.

Designs and fabricates equipment, materials, systems utilizing engineering practices and principles. Performs failure analysis and other issues.

Operates, maintains, and repairs specialized equipment. May manage local computer systems for laboratory functionality.

Ensures supplies are available and operational for use in projects.

Prepares technical reports for long and short-range planning.

May perform other duties as assigned.
