An earned Ph.D. degree (All-But-Dissertation, ABD, cases will be considered) in Electrical Engineering with a specialization in power engineering, or a closely related field, with a research emphasis on distribution grid modernization; such as but not limited to modeling and design, planning and operations, and microgrids. Excellent written and oral communication skills. Strong publication record in the area of distribution grid modernization. Potential to collaborate with other faculty in research.

Research experience in developing multidomain cosimulation frameworks utilizing real-time simulators, particularly Typhoon HIL, networked microgrids for active distribution system flexibility and resiliency. Proven interdisciplinary research experience on state/federally funded projects. Experience in proposal writing.

EEO/AA Policy

Equal Employment Opportunity

Tennessee Tech will not discriminate against a job applicant or an employee because of the person's race, color, religion, sex (including pregnancy), national origin, age (40 or older), disability or genetic information. It is illegal to retaliate against a person because the person complained about discrimination, filed a charge of discrimination, or participated in an employment discrimination investigation or lawsuit.
