**Faculty of Engineering, School of Electrical and Computer Engineering**

**Reference no. 0124115**

- Based at Camperdown Campus, Sydney, close to parks, public transport hubs and shopping districts
- Join the Sydney Horizon Educators cohort in the Faculty of Engineering
- Continuing full-time position with an attractive remuneration package
- Access up to AUD\$30K to support education-related activities, including education-related research and education-related professional development and learning

**About the opportunity**

The University of Sydney welcomes applications for an **Associate Professor/Professor in Software Engineering (Education Focused)** in the Faculty of Engineering.

As one of the world's leading engineering and technology colleges, the [Faculty of Engineering](#) is dedicated to internationally recognized excellence in both teaching and research. We collaborate with global leaders from business, industry, and academia, fostering partnerships that expand the global perspective of our staff, researchers, and students. By encouraging diverse forms of collaboration, we aim to deepen knowledge, broaden horizons, and create holistic solutions to today's most pressing challenges.

The [School of Electrical and Computer Engineering](#) is dedicated to innovative teaching and research for the digital world. We undertake research across a range of electrical engineering disciplines, emphasising future energy networks, wireless communications, computer, software, photonics and the Internet of Things.

With the introduction of the new University of Sydney Enterprise Agreement 2023-26, the University has committed to establishing and advertising new continuing education focused academic positions. The positions are for talented educators with a passion for, and demonstrated excellence in, teaching, curriculum design, educational practice and innovation, as well as research capability (in disciplinary and/or education-related research). This newly recruited group of educators are recognised both

internationally and within the university for their expertise in educational delivery and will support an uplift in the teaching capability and student experience at the University of Sydney.

Successful candidates will join the Sydney Horizon Educators cohort. For further insights into this exciting opportunity, we invite you to watch this [video](#).

The Associate Professor/Professor in Software Engineering (Education Focused) dedicates the majority of their contribution to teaching and teaching-related activities (up to 70%), with a minimum of 20% research and 10% governance, service, and engagement. Additionally, you will mentor junior academics, providing advice on teaching methodologies, education research approaches, publications, and career advancement.

You will exhibit educational leadership, guiding the School, Faculty and University in strategic planning, setting educational goals, and shaping educational policies and initiatives. Furthermore, you will lead industry collaboration and outreach activities, establishing partnerships for internship opportunities, organising industry panels to review curricula, and conducting outreach to amplify the impact of our software engineering program.

As a key member of the School, you will oversee the organisation and delivery of courses within the software engineering program, working closely with fellow academics and addressing student consultations. An important focus will be leading curriculum review and improvement, continuously leveraging student feedback to enhance instructional materials. You will play a pivotal role in course design and development, proposing and crafting new courses that meet our educational objectives, such as Requirements Analysis, Software Process and Quality, Programming and Trustworthy AI Software Systems, among others.

Designed for a dynamic and innovative educator, the Associate Professor/Professor in Software Engineering (Education Focused) will deliver effective teaching across a broad spectrum of software engineering courses, including but not limited to Software Development, Machine Learning, Computer Systems, and Networks. A commitment to research and scholarship in educational methodologies, technology, and pedagogical approaches within software engineering will be fundamental.

The role demands active engagement with educational technology, upholding academic integrity, and contributing to educational committees.

### **About you**

Associate Professor/Professor in Software Engineering  
(Education Focused)  
University of Sydney

We are looking for an outstanding educator in the field of software engineering to provide educational leadership within the School. **Applicants should possess the following qualifications and attributes, and include a response to each of the Selection Criteria as part of their application:**

- A completed PhD in Software Engineering or a related area
- Deep knowledge of software engineering including but not limited to software development, machine learning, computer systems, and networks
- History of a strong commitment to research and scholarship in educational methodologies, technology, and pedagogical approaches within software engineering
- Proven international standing for academic excellence demonstrated through original, innovative and distinguished contributions to scholarship and research
- A strong dedication to teaching excellence, with a notable track record for enhancing student outcomes and pioneering educational innovations
- An established network of relationships with key academic, industry and professional institutions, partners and stakeholders with the ability to integrate these relationships to assist in curriculum development and student learning
- Demonstrated community service with significant contribution to governance and collegial life within the university, including undertaking significant administrative and/or committee positions.

### **Term and remuneration**

The successful candidate will be offered a continuing position on a full-time basis and will be offered a competitive remuneration package commensurate with the responsibilities of the position and the candidate's relevant experience and qualifications.
