degrees in civil engineering, City and Regional Planning, Mathematics, Statistics, Computer Science, and other related fields are encouraged to apply. To learn more about past and current research of the students, as well as to know more about our alumni, please go to <http://www.ce.memphis.edu/smishra/>.

Deadlines to apply:

Applications will be accepted until the positions are filled. Selection will be made on a rolling, first-come, first-served basis.

How to apply:

To be best considered for the position, please send the following documents to Dr. Sabya Mishra/Dr. Pranab Kar at smishra3@memphis.edu / pkar@memphis.edu

- Statement of Purpose; 2) Curriculum Vitae with three references; 3) GRE and TOEFL scores;

Responsibilities:

- Conduct research on topics related to traffic safety, transportation systems engineering, driver behavior modeling, and intelligent transportation systems.
- Collect and analyze data using advanced statistical and machine learning tools.
- Develop and validate models for traffic safety and operational performance.
- Contribute to the preparation of technical reports, research papers, and presentations for conferences.
- Assist in grant proposal writing and project management.
- Collaborate with faculty, researchers, and industry partners to solve real-world transportation problems.

Qualifications:

- Must be enrolled or accepted into a graduate program at the University of Memphis in Civil Engineering or a related field.
- Strong academic background in transportation engineering, traffic operations, or related areas.
- Proficiency in programming languages (Python, R, or MATLAB) and data analysis tools (ArcGIS, QGIS).
- Experience with statistical analysis and modeling is a plus.
- Excellent written and oral communication skills.
