Job Title	Research Fellow/Research Associate (Active Noise Control)
Department	School of Electrical and Electronic Engineering
Institution	Nanyang Technological University Singapore, , Singapore
Date Posted	Oct. 23, 2024
Application Deadline	Open untill filled
Position Start Date	Available Immediately
Job Categories	Research Scientist/Associate
Academic Field(s)	Electrical and/or Electronics Computer Engineering Engineering - Other

which close to 1,000 are graduate students, it is one of the largest EEE schools in the world and ranks 10th in the field of Electrical & Electronic Engineering in the 2024 QS World University Rankings by Subjects.

We are looking for a Research Fellow/Research Associate who will be responsible to lead the effort to translate high-level audio algorithms implemented in other audio prototyping software into a high-performance, architecture-specific code and will work closely with other researchers to design and implement DSP algorithms that meet system-level constraints. The Research Fellow/Research Associate will also be defining and implementing software architecture for real-time audio systems on prototype hardware containing a multitude of co-processors.

Key Responsibilities:

- Writing, debugging, optimizing and testing of source code with an emphasis on audio applications
- Maintenance and improvement of existing audio algorithm code base including noise reduction, acoustic echo cancellation, automatic gain control, voice activity detection, packet loss compensation and other audio enhancements
- Supporting Research and Feasibility Studies including defining the scope and goals of audio research tasks and completion of detailed reports on results and recommendations for development activities
- Software development of new algorithmic audio processing solutions including the existing areas mentioned above and additionally including state of the art audio codecs, audibility and intelligibility enhancements, microphone array processing, noise control, 3D audio and other audio effects and enhancements
-

Project management tasks including creation and maintenance of requirements and schedule documentation for assigned projects, project budget etc.

- Publish journal and conference papers as dictated by the assigned projects.
- Provide guidance of PhD/Master/undergrad students.

Job Requirements:

- PhD/Masters in Electrical and Electronic Engineering/Computer Engineering field
- More than 1-2 years research experience in related area
- Strong audio signal processing fundamentals (for example, Fourier analysis, transfer functions, filtering, linear algebra, matrix algebra etc)
- Perform independent research and development of emerging and future audio technologies
- Experience conducting acoustic measurements using standard acoustic equipment (speakers, microphones, anechoic chambers, acoustic mannequins)
- Ability to communicate findings and ideas to other teams and to management using both written documents and Keynote presentations
- Ability to effectively contribute in a fast-paced, cross-functional environment
- Preferred experience with spatial audio and HRTFs, acoustic room modeling, collecting,
