The position involves securing funding, attracting new competent human resources and building a team capable of implementing scientific and technological advances in the modelling and hydrodynamic simulation of maritime infrastructures in coastal and offshore areas.

Academic Qualifications

Mechanical Engineering, Civil Engineering, Naval Engineering

Minimum profile required

- Experience in hydraulics, hydrodynamics and the simulation and dimensioning of infrastructures in a maritime environment.

Preference factors

- Previous experience in research projects such as FCT, H2020/HEurope, PT2020/2030, etc.
- Ability to write and attract funding.
- Previous experience as a team leader.
- Previous experience in physical ocean processes and coastal processes.

Salary Level

In accordance with article 15 of the RJEC and article 2 of Regulatory Decree no. 11-A/2017, of 29 December, the gross monthly base remuneration to be awarded is based on remuneration level 1 of the Investigador Auxiliar category of the Public Scientific Research Career Statute, with INESC TEC applying its own remuneration table for R&D doctoral employees, with a value of €3488.49 for the equivalent category.
