Minimum profile required

- Proven competence and experience in developing applications in C++, C, Fortran and Python.
- Experience in developing parallel applications in shared memory, using technologies such as OpenMP, TBB, among others.
- Experience in developing parallel applications in distributed memory, using MPI.
- Experience in using profilers for the computational characterization of applications in shared and distributed memory environments such as VTune, TAU, Perf, among others.
- Knowledge of supercomputer architectures, including x86 and ARM processors, GPUs, and interconnection topologies.
- Practical experience in Linux systems, HPC environments and SLURM submission systems.
- Proficiency in written and oral communication in Portuguese and English.

Preference factors

- Knowledge and experience in high-performance libraries, such as FFTW, BLAS, LAPACK, Intel MKL.
- Knowledge of optimization techniques for multicore architectures, hardware accelerators, and communication standards.
- Experience in programming GPU accelerators using tools such as OpenCL, CUDA, OpenACC, among others.
- Experience in using scientific visualization tools, such as Paraview, Visit, YT.
- Experience in writing technical and scientific documentation in HPC, proven by active participation in conferences and workshops in the area.
