We are looking for a Research Fellow to lead a project titled Closed-Loop Advanced Manufacturing Process (c-LAMP) under NTU. The role will focus on developing a modularized and energy-efficient treatment process, ie. electrochemical-biological hybrid process to treat secondary waste, ie. wastewater from swarf cleaning, with the purpose of effective water reuse, forming a circular pre-treatment loop for the manufacturing process.

**Key Responsibilities:**

- Profiling and understanding the type of incoming wastewater
- Tailoring the treatment system to water reuse requirements
- Modularizing treatment units for applications of different wastewater from different industries

**Job Requirements:**

- PhD degree in Environmental Engineering, Chemical Engineering or related field
- At least 1 year of relevant experiences in similar role / technical hands-on experience in Bioprocess and/or Electrochemical process
- Familiarity with reactor operation and process design
- Good written and oral communication skills
-
