Position Summary

The research scientist position requires candidates to have good experience in photoacoustic and ultrasound systems for human diagnosis.

The essential job duties includes:

- Develop advanced photoacoustic and ultrasound imaging and sensing systems.
- Develop image reconstruction and processing algorithms.
- Perform data analysis to extract physiological information from the data.

Outstanding Benefits Package

Working at UB comes with benefits that exceed salary alone. There are personal rewards including comprehensive health and retirement plan options. We also focus on creating and sustaining a healthy mix of work, personal and academic pursuit - all in an effort to support your work-life effectiveness. We support your growth and development through our career coaching and training department and we qualify as a public service loan forgiveness organization.
