1. Digital maturity and its assessment in different industrial sectors.
2. Data sharing and the development of data ecosystems.
3. Methodologies for designing and implementing effective data management strategies.
4. Application of the results in the creation of advanced consultancy services.

Over the course of the scholarship, the scholarship holder will have the opportunity to:

1. Explore and characterise innovative tools for assessing the maturity of corporate data management.
2. Create a personalised methodology for assessing data management maturity, adapted to the Portuguese industrial fabric.
3. Contribute to the definition of strategies for the development of data sharing ecosystems in industrial sectors.
4. To apply and validate the concepts by creating pilot ecosystems in two industrial sectors.
5. Participate in the production of technical-scientific documents and the final report of the scholarship.

If you are interested in digital transformation, data management and industrial innovation, this scholarship gives you the chance to join a reference project, gain practical experience and collaborate with experts in the field.

Academic Qualifications

- Master's degree in computer engineering, industrial engineering, information systems, information science, management or related field;

Minimum profile required

- Average of bachelor's and master's degrees higher than 14;

Preference factors

- Experience in data management models.
- 1 paper published in a conference or peer-reviewed journal.
