Position Summary

The [Department of Biomedical Engineering](#) is seeking a **Research Technician II**. This position will involve making sure our research laboratory is compliant with animal protocols. This will include writing and amending the protocols, maintaining a mouse colony and carrying out small animal technical work. Another responsibility will be assisting with tumor models and ensuring daily monitoring is completed by students. He/she may treat mice and rats with therapeutic agents via tail-vein administration. Rat and mouse blood collection will be carried out. The candidate should also maintain cells in tissue culture. Additional responsibilities include engaging with graduate students on a variety of research projects.

Outstanding Benefits Package

Working at UB comes with benefits that exceed salary alone. There are personal rewards including comprehensive health and retirement plan options. We also focus on creating and sustaining a healthy mix of work, personal and academic pursuit - all in an effort to support your work-life effectiveness. We support your growth and development through our career coaching and training department and we qualify as a public service loan forgiveness organization. Learn more about our [benefit packages](#).

About The University at Buffalo

The University at Buffalo (UB) #ubuffalo is one of Americas leading public research universities and a flagship of the State University of New York system, recognized for our excellence and our impact.
