Job Description

The Research Engineer will support experimental and applied research in advanced sensing technologies, nanomaterials, and microfluidic systems within the Mechanical Engineering Department. The position involves developing and integrating innovative sensing platforms, working with advanced materials and analytical techniques, and collaborating on multidisciplinary research projects aimed at advancing engineering applications in biomedical, environmental, and industrial domains. A PhD in Materials Science and Engineering is desired.

Auburn University is more than just an institution; it's a vibrant community where real people come together to make a difference. Our commitment to students, employees, communities, and our world runs deep, and it's reflected in every corner of our campus and beyond.

- **Life-Changing Impact:** At Auburn, our work changes lives. Whether it's groundbreaking research, innovative teaching, administrative operations or community outreach, every effort contributes to positive change. We're not just clocking in; we're making a lasting difference in the
