Job Description

One research fellow in Maritime Studies is available with flexible start time in the School of Civil and Environmental Engineering (CEE) at Nanyang Technological University (NTU) is available. The appointment is for 1 year with a provision for further extensions subject to good performance and availability of research funding.

Key responsibilities:

- Develop state-of-the-art and innovative models and algorithms to improve port and shipping management efficiency;

- Propose solutions based on game theory and operations research to address maritime practical problems;

- Develop mathematical models to model practical problems and choose proper solution approaches for solving the problem;

- Conduct extensive numerical experiments to validate the performance of the proposed models;

- Present the research results as academic papers and reports;

Job requirements:

- Must hold a PhD degree in transport engineering, maritime transport and management, computer science, or a related field from a good university;

- Excellent programming skills, such as Python, C++, Java, Julia, or other competent languages;

- A good record of publications in reputable peer-reviewed journals or conferences in maritime transport, logistics management, machine learning, deep learning, and optimization;

- Proficient in written and spoken English - essential for data analysis and communication with

stakeholders

- Experience in proposal writing and funding application is a plus.

We regret that only shortlisted candidates will be notified.
