About the role

We are delighted to have the opportunity to recruit to two new academic positions in the [Department of Aeronautics](#). Our department prides itself on hosting and nurturing highly talented academics and we welcome applications from all candidates working at the cutting edge of their fields of choice. For this reason, the level and exact discipline of the post has been left open and the appointments will therefore be made dependent on your experience at the level of Lecturer (Assistant Professor), Senior Lecturer, Reader (Associate Professor) or Professor.

What you would be doing

You will develop a broad range of research in your discipline, leading or contributing to a research area at the highest scientifically rigorous levels. You will apply for research funding and manage the resources (including where relevant a research team) of successful grants.

You will teach and examine courses at all levels (undergraduate, MSc and PhD degrees) through lectures, seminars, tutorials, coursework and personal supervision. You will plan and review your own approach to teaching as well as contributing to the development of the department's curriculum and its teaching and assessment methods.

You will be presented with opportunities to contribute to the wider strategic goals of the department, faculty and university through administrative or leadership responsibilities, attending relevant committees or providing representation at internal or external meetings and working groups.

Full information on duties, responsibilities and criteria for the post can be found in the Job Description.

What we are looking for

We are seeking applicants that are (or have the potential to be) leaders in their fields of research and are passionate about delivering world-class education.

Given the open nature of this advertisement, we would advise all candidates to review the selection criteria for each level of appointment which can be found in section 8 (person specification) of the job description.

What we can offer you

- The opportunity to continue your career at a world-leading institution and be part of our mission to use science for humanity.

Lecturer / Senior Lecturer / Reader / Professor in
Aerospace Engineering
Imperial College London

- A relocation allowance of up to £8,000
- Grow in your career with tailored training programmes for academic staff including dedicated support with navigating your career and managing research as well as a transparent promotion process.
- Sector-leading salary and remuneration package (including 39 days off a year and generous pension schemes).
- Be part of a diverse, inclusive and collaborative work culture with various [staff networks](#) and resources designed to support your personal and professional [wellbeing](#).

Further information

Please see our [further particulars](#) for more information about the College and the benefits available to staff.

If you require any further details about the role, please contact the Director of Operations, Siân Haynes, Email s.haynes@imperial.ac.uk.

Candidates who would like an informal conversation before making their decision to apply can also contact the Head of Department, Professor Spencer Sherwin, Email: s.sherwin@imperial.ac.uk

Closing date: 11 May 2025
