engineering theories and principles.

These positions will be based on two-year terms which will be renewable based on performance and abilities to secure and support externally funded research.

Essential Functions

Essential Functions include, but are not limited to:

- Performs a variety of research and development activities requiring the application of engineering or science-based practices and principles.
- Designs, operates, maintains, and repairs specialized equipment and engineered systems utilizing engineering or science-based practices and principles.
- Advises faculty, postdocs, students, and staff with engineering design, modification, prototype and process development, analysis procedures, and other engineering solutions.
- Performs failure analysis, optimization studies and other investigations.
- Evaluates findings to develop new concepts, equipment, or processes.
- Ensures supplies are available and operational for use in projects.
- May manage local computer systems for laboratory functionality.
- Develops proposals, budgets, schedules and progress reports and presents results to internal and external stakeholders.
- Prepares technical reports for long and short-range planning.

Why Work at Auburn?

- **Life-Changing Impact:** Our work changes lives through research, instruction, and outreach, making a lasting impact on our students, our communities, and the world.
- **Culture of Excellence:** We are committed to leveraging our strengths, resources, collaboration, and innovation as a top employer in higher education.
- **We're Here for You:** Auburn offers generous benefits, educational opportunities, and a culture of support and work/life balance.
- **Sweet Home Alabama:** The Auburn/Opelika area offers southern charm, vibrant downtown scenes, top-ranked schools, and easy access to Atlanta, Birmingham, and the Gulf of Mexico beaches.
- **A Place for Everyone:** Auburn is committed to fostering an environment where all faculty, staff, and students are welcomed, valued, respected, and engaged.
