Job Description

In the Environmental Microbial Biofilm Biotechnology (EMBB) research group, we focus our research efforts on understanding biofilm-mediated environmental processes and harnessing the power of microbial biofilms to address environmental issues. We are looking for a highly motivated Project Officer (PO) with an interest in biofilm-plastic interaction. The PO is expected to publish high-quality journal papers to promote the international reputation of the group and the University.

The PO will work on a project aiming to understand how biofilms interact with plastics in marine environments and use the insights to develop novel biotechnologies to upcycle plastic wastes.

Key Responsibilities:

- Rigorously design and perform experiments.
- Perform in-depth, critical data analyses.
- Effectively communicate through presentations and high-quality journal publications.

Job requirements:

- BSc/BEng in environmental microbiology, microbial biotechnology or a related field.
- Hands-on experience in molecular cloning.
- A strong interest in interdisciplinary research.
- Excellent interpersonal skills to work effectively with group members and collaborators.
- Good oral and written communication skills in English essential for data analysis and communication with stakeholders
- Demonstrated ability to work efficiently and with minimum supervision.

We regret to inform that only shortlisted candidates will be notified.
