Job Description

This post-doc position is for fresh PhD graduates in the field of Electrical Engineering, Computer Engineering, Computer Science, Industrial Engineering, or closely related engineering field. Accepted applicants will be mainly working on cyber-physical systems security. The tasks include, but not limited to, building machine learning models to detect attacks on various industrial cyber physical systems, setting up/running simulations on real-time simulators (OPAL-RT), demonstrating willingness to contribute intellectually to research projects, leading journal/conference paper writing/submission/revision, and assisting in supervising PhD students. The research activities will be conducted at the center for advanced power systems at Florida State University in collaboration with research faculty, and our industry and university partners.

Applicants are asked to submit:
