Support the development and implementation of methods for analyzing space logistics challenges.

- Conduct comprehensive reviews of scientific literature to inform research design and methodology.
- Assist in drafting reports, technical papers, and academic publications.
- Prepare and deliver status updates and research summaries to project stakeholders.
- Provide general support for ongoing, externally funded research projects.

**Required Qualifications:**

- Master's degree or currently pursuing a Ph.D. in Systems Engineering or a related field.
- Strong interest or background in space systems design and analysis.
- Experience working on interdisciplinary teams and contributing to collaborative research efforts.
- Excellent written and verbal communication skills.
- Strong organizational and time-management abilities.

**Preferred Qualifications:**

- Familiarity with data analysis tools and/or modeling software.
