Engineering in the 2023 QS World University Rankings by Subject.

Established in 1981, the School of EEE is one of the founding Schools of the Nanyang Technological University. Built on a culture of excellence, the School is renowned for its high academic standards and research backed by 120 faculty members and 300 researchers from all over the world. To date, NTU EEE has an enrolment of 4,000 students of which about 1,000 are graduate students. In order to support advanced research, the School hosts 13 research centres and facilities which are well-equipped with sophisticated and state-of-the-art equipment. Besides the 13 centres, there are more than 50 laboratories, supporting both the teaching and research activities in the School.

Join the School of EEE as a faculty member and embark on a challenging and exciting career in research innovations and teaching excellence, so as to prepare engineering leaders of the future.

We are seeking a candidate who will develop, lead and sustain research of an international standard as a technological leader in power systems engineering, and have an excellent record of distinguished academic and scholarly achievements along with a demonstrated commitment to the core traditions of excellence and innovation. As a tenured full Professor / Associate Professor, he/she is also expected to provide academic leadership and excellence in the area of power systems engineering for NTU's School of EEE.

The selected candidate will be on an endowed professorship and is expected to work closely with NTU's industry partners in developing capability aligned with the technology needs of the companies in the area of power engineering.

Requirements:

Successful candidates must have:

- A relevant PhD from a reputable university
- Evidence of a developing international reputation in power engineering, for example fellowships, awards, invited presentations at international conferences, journal editorships, etc.
- Established track record of academic publications of international quality
- Proven track record of securing funding as Co-I or lead investigator
- Extensive research and teaching experience in power engineering
- Successful track record of academic/research leadership and team building

- Experience in cross-disciplinary research initiatives and collaboration
- Well-developed understanding of the priorities and strategies of relevant funding bodies
- Successful training and development of early career researchers and/or PhD students
- Strong network and ties with renowned international entities and organisations

Responsibilities:

- Develop and lead an innovative research programme of international quality
- Publish high quality papers in reputable peer-reviewed journals
- Secure competitive research grants
- Give talks at international conferences, and supervise research personnel
- Contribute to teaching and course development at the undergraduate and postgraduate levels
- Supervise undergraduate and graduate students undertaking research projects
- Undertake administrative and/or leadership roles
- Contribute to other service-related activities assigned by the School, College and University.

Skills

Essential:

- Ability and drive to develop project activities in one or more of the fields detailed above
- Excellent communication and presentation skills, both oral and written
- Excellent interpersonal skills, including the ability to enthuse students
- Time/project/budget management skills
- Self-motivation and ability to work independently and as part of a team
- Ability to secure research grant funding and initiate new projects; lead a research team and develop an international research profile
- Ability to work in collaboration with colleagues

Desirable

- Ability to take on a leadership role and motivate students
- Ability to accept collegiate responsibilities and act accordingly
- Significant research leadership and facilitation skills
- Demonstrable ability to provide strategic contribution at Subject or School level

Emoluments and General Terms and Conditions of Service:

**Professor (Tenured) / Associate Professor (Tenured) in
Power Systems Engineering
Nanyang Technological University**

Salary will be competitive and will be commensurate with qualifications and experience. The University offers a comprehensive fringe benefit package.

Application:

Applicants are invited to submit their applications (cover letter, CV, research and teaching statements, and citation reports) through the NTU career portal.

Please ensure that your CV, among other information, also includes the following:

- 1) Detailed teaching plan and research plan
- 2) Number of and monetary amount of research grants held at present and in the past, identifying clearly your contributions as PI or Co-PI
- 3) Number of Masters and PhD students currently supervising/co- supervising
- 4) Number of Masters and PhD students graduated
- 5) Names, addresses, and e-mail addresses of 5 international referees.

Review of applications and shortlisting of applicants will be carried out on an on-going basis until the position is filled. Only shortlisted candidates will be notified.
