<b>Job Description</b>	

Research Opportunities

**Electrical Engineering with experience in power systems**

### Work description

The Alliance for Energy Transition (ATE) project aims to develop and industrialize new technologies to support the decarbonization of society, taking advantage of technological and scientific knowledge in

the field of Energy in Portugal. The selected candidate will be responsible for the management and technical operation of a production site and injection of marine renewable energy into the electrical grid and for the control of renewable production.

It must also implement an operation and maintenance plan and the evolution of the testing infrastructure, in particular with regard to the specification of the data acquisition and supervision, protection, command and control system of the installation that foresees the installation of a new substation and marine connections (offshore), submarine cable to land and onshore substation with connection to the national electricity grid based on greater injection capacity into the grid.

### Academic Qualifications

- Bachelor's Degree or Master's degree in electrical engineering, electrical power systems, or related field.

### Minimum profile required

- Experience in renewable energy production solutions.
- Experience in designing and sizing energy systems. (BT).
- Experience in supervision and data acquisition systems.

### Preference factors

- Experience in command, control and protection systems for electrical installations.
- Knowledge of electronics, networks and communication systems is valued.
- Registration with the Order of Engineers is valued.
- Fluency in Portuguese (written and spoken).
- Fluency in English (written and spoken).

### Application Period

Since 23 Jun 2025 to 04 Jul 2025

### Centre

Robotics and Autonomous Systems

### Scientific Advisor

[Eduardo Silva](#)

### What we offer

- **Multicultural and collaborative environment**
- A multicultural, international and collaborative environment that makes it easier to exchange ideas, work in networks and create synergies.
- **International projects**
- The possibility of working in international projects with some of the most important companies in the field.
- **Mentoring**
- Mentoring with the best researchers in the fields of electrical and industrial engineering, bioengineering, information technology and physics.
- **Self Improvement**
- The possibility of participating in international conferences, workshops, seminars and vocational training.
- **Other Benefits and Perks**
- Flexible working time, health insurance, discounts in hotels, transportation, etc.
- **Informal Events**
- Annual informal events, such as the multicultural party.
