Job Title	HSE1 - Circular economy strategies applied to the decommissioning of current and future FPSO
Department	Departamento de Engenharia de Produção https://ppgen.poli.usp.br/
Institution	Universidade de São Paulo São Paulo, , Brazil
Date Posted	Aug. 19, 2025
Application Deadline	Open until filled
Position Start Date	Sep. 2, 2025
Job Categories	Post-Doc
Academic Field(s)	Industrial & Systems Engineering
Job Website	https://www.linkedin.com/company/otic-offshore-technology-innovation-center/
Apply By Email	otic.jobs@usp.br

Job Description

The project aims to define and implement circular decommissioning strategies focused on the most common FPSO platforms in Brazil. Different circular approaches will be identified and evaluated to maximize value opportunities within the internal cycle. A Virtual Decommissioning System will be developed, integrated with a Digital Twin of the FPSO platform, including a full inventory of facilities, equipment, and all technical and operational aspects.

The postdoctoral research focuses on developing an offshore circularity index and conducting environmental and social life cycle assessments (LCA) of FPSO platforms, particularly the FPSO Espírito Santo, which will serve as a pilot project for circular decommissioning. The study will be based on the FPSO inventory (Work Package WP3), covering topside, subsea, and reverse logistics. LCA will
