Job Requirements

A Doctorate (NQF Level 10) in Electrical Engineering or related field with at least six (6) years of lecturing experience at tertiary education level and/or industry experience, or an equivalent combination of relevant professional experience. Excellent English communication skills (oral and written). Proven competence in sourcing research or project funding from third-party sources, successful initiation and management of research projects, curriculum development, and strong management/organisational and mentorship skills. Competence to teach at least three (3) of the following courses: Power Systems, Power System Protection, Energy Storage, High Voltage Engineering, Transmission and Distribution Networks, and Renewable Energy Systems. Competence to establish professional networks and to maintain links with the industry. Experience in developing postgraduate programmes, a credible record of teaching, research supervision at both under-and post-graduate levels, and publications in accredited journals and service, a sound research profile with Google Scholar h-index of 4, and successful supervision of Master's (research) students will be an advantage.
