Job Requirements

A Doctorate (NQF Level 10) in Chemical Engineering or related field with at least six (6) years of lecturing experience at tertiary education level and/or industry experience or an equivalent combination of relevant professional experience. Excellent English communication skills (oral and written). Proven competence in successful sourcing of research or project funding from third-party sources, successful initiation and management of research projects, curriculum development, and strong management/organisational and mentorship skills. Competence to teach at least three (3) of the following courses: Reaction Engineering, Process Modelling and Optimisation, Process Plant Design and Economics, Transport Phenomena, Reaction Engineering, Biochemical Engineering, Computer Aided Process Design and Engineering Practice, Process Control and Instrumentation. Competence to establish professional networks and to maintain links with the industry. Experience in developing postgraduate programmes, and a proven record of raising substantial research funding, a credible record of lecturing, peer-reviewed publications, community engagement, programme coordination, as well as supervision of students (research) at both under- and post-graduate levels, a sound research profile with a Google Scholar h-index of 4 and successful supervision of Master's (research) students will be an advantage.
