### **The City College of New York - United Nations University Dual Degree Master's Program in Earth System & Environmental Engineering**

The Dual Master's Degree program is specifically designed for individuals aspiring to specialize in environmental sustainability. The curriculum is meticulously crafted to equip students with expertise in the realm of the United Nations Sustainable Development Goals. This highly selective program offers students a unique opportunity to acquire advanced knowledge and technical skills essential to addressing the most pressing global environmental challenges.

#### **Key Program Features**

- Upon successful completion of the 30 required credits, students will be conferred with a degree in Earth System and Environmental Engineering, complemented by a United Nations Certificate in Sustainability.
- Students will collaborate with United Nations-affiliated scientists, providing them with invaluable insights and expertise.
- The City College of New York (CCNY), the sole public engineering institution in Upper Manhattan, provides students with an accessible pathway to a successful career in engineering. Notably, nearly all of our students graduate without incurring significant debt.
