**Job
Description**

The Electrical and Computer Engineering Department at Rose-Hulman Institute of Technology is searching for an inspiring educator at the Assistant Professor level who shares our passion for teaching undergraduate engineering students. Our teaching-focused mission is “to provide students with the world’s best undergraduate science, engineering, and mathematics education in an environment of individual attention and support.” If this resonates with you, and you want to positively impact the lives of future engineers, then we think you’ll love what we have to offer.

The department consists of nineteen faculty, and we offer two degrees, a B.S. in Electrical Engineering and a B.S. in Computer Engineering. Both are accredited by the Engineering Accreditation Commission of ABET and ranked as top programs in the country for institutions without Ph.D. programs.

The immediate need is for applicants with specializations in Electromagnetics, but applicants in all areas of electrical and computer engineering will be considered. Applicants should demonstrate a strong commitment to undergraduate engineering education, including laboratory instruction and lifelong personal and professional development. The anticipated start date is August 2026.

The primary requirement is a doctorate or near completion in electrical or computer engineering or a closely related field. The department and institute place a high value on supporting all our students; candidates who are excited to enhance student engagement and community are especially encouraged to apply. Candidates who can further broaden and enhance the educational experience of our students, especially those with prior industrial experience, are also encouraged to apply.

Essential job responsibilities include teaching and advising students, continued professional development, and service to the department, Institute, and professional community. Applicants should submit the following information via <https://jobs.rose-hulman.edu>,

- a CV/resume,
- cover letter,
- statement of teaching philosophy,
- statement of professional development, which we define broadly as continued intellectual growth throughout one’s career, and
- list of up to three professional references.
