Singapore, is a leading school for Sustainable Built Environment. The School plays an integral role in spearheading tertiary education, advancing research innovations and providing professional services in a number of key disciplines in Civil and Environmental Engineering and Maritime Studies fields, with the objective of contributing to the technological and economic advancement of Singapore and beyond. The School's mission in research is to achieve excellence by providing a conducive and intellectually stimulating environment to enable high quality work in strategic directions that are of significant impact to industry, science and technology.

For more details, please view School of Civil and Environmental Engineering | NTU Singapore

Yin's lab led by Asst/Prof YIN Xiaole focuses on understanding the environment-microbe-human complex interactions. Yin's lab is looking for a highly motivated Research Fellow (RF) with an interest in computational biology. The RF will work on a project aiming to understand how to predict the microbial community under environmental pressure and use the insights to develop approaches for intervention.

#### **Key Responsibilities:**

The roles of this position include:

- Rigorous study design.
- Perform in-depth, critical data analyses.
- Effectively communicate through presentations and high-quality journal publications.
- Assist in supervising research students in the group.
