**Job Description**

**Job Description**

As the postdoctoral researcher, the candidate will conduct research experiments in the field of computer engineering, especially in investigating the development of scalable graph and hypergraph algorithms using machine learning techniques, with a specific focus on their application in the field of electronic design automation (EDA). This research area holds immense potential to advance the efficiency and effectiveness of EDA tools, ultimately leading to enhanced circuit design processes. The candidate will also participate in manuscript writing for publication in scientific journals or conferences. Other duties may also be assigned, which may include attending scientific conferences and meetings.
