within the team and related stakeholders.

The project manager will also assist the PI to supervise experiments in the laboratories, train students in the use of instruments, and help design, construct, and operate the experimental setups. Continued education and/or training will be required in order to remain proficient and up to date with the state-of-the-art technology to support this leading edge research.

Required Minimum Qualifications: Master's degree in Civil Engineering or other relevant fields and experience on manufacturing and characterization of cementitious materials.

Skills and Knowledge: The ability to work collaboratively with faculty, staff, and students. Strong English writing and speaking skills. Self-motivated, responsible and enthusiastic personality.

Preferred Qualifications: Ph.D. in Civil Engineering or other relevant fields. Experience with manufacturing of ready-mix concrete and/or precast concrete. Experience with project management and research.

EEO/AA Policy

The University of Alabama is an Equal Employment/Equal Educational Opportunity Institution. All qualified applicants will receive consideration for employment or volunteer status without regard to race, color, religion, national origin, sex, sexual orientation, gender identity, gender expression, pregnancy, age, genetic or family medical history information, disability, protected veteran status, or any other legally protected basis, and will not be discriminated against because of their protected status. Applicants and employees of this institution are protected under Federal law from discrimination on several bases.
