Job Responsibilities

- Design and teach labs & practice modules.
- Mentor students in Capstone Projects and the Integrated Work Study Programme (IWSP).
- Lead or co-lead innovation projects with industry.
- Manage labs and equipment to support academic programmes and applied research.
- Ensure safety in labs

Job Requirements

- A degree in Computer Science or related Engineering discipline. Possessing a Masters degree, PhD degree and relevant certifications will be an added advantage.
- At least 10 years working experience in embedded firmware and/or software applications in an engineering environment.
- Knowledge in Vue, High chart software or MQTT will be advantageous.
- Proficient in programming languages such as C#, C/C++, Python and Java
- Hands-on experience in embedded system design and implementation (IoT, sensors, Single Board Computers, Microcontroller)
- Knowledge related to Machine Learning or AI will be advantageous.
- Work independently, as well as within a team, to ensure that the project can meet the milestones adhering to the stipulated timeline
- Extensive experience and knowledge of industry practices to bring industry perspective to SIT.
- Keen interest in innovation projects, with demonstrated ability in developing solutions to technical problems.
- Strong supervisory skills and enjoy working closely with students in an educational environment.
- Demonstrate proficiency to keep abreast of development in the field and pursue professional certification programs. Possess industrial certifications in relevant areas will be an added advantage.
