**Job Description**

The Department of Civil Engineering at New Mexico State University (NMSU) invites applicants to apply for a tenure-track faculty position at the Assistant or Associate Professor level in the general area of Structural Engineering. NMSU has its home in Las Cruces with a warm climate and a vibrantly diverse culture. The successful candidates will be committed to teaching excellence and expected to develop and sustain an externally funded research program. The selected individual will teach undergraduate and graduate courses in structural engineering (including design courses), advise undergraduate and graduate students, and serve the department, college, university, and professional

community.

A strong background in advanced manufacturing or construction (such as 3-D printing with concrete), machine learning in civil engineering, automated construction or mechatronics, advanced materials with civil engineering applications, bridge engineering, energy infrastructure, computational modeling, blast mechanics, or micro-mechanical modeling is desirable but not necessary for applicants. Applicants are expected to have bachelor and doctoral degrees in civil engineering or closely related fields and to be licensed engineers or have the ability to become licensed within five years. Registered Professional Engineers are especially encouraged to apply.

Applicants should attach a cover letter, curriculum vita, a two-page statement of teaching interests, a two-page statement of research interests, and contact information for three professional references (including name, address, telephone, and email).
