### Key Responsibilities:

- Collaborate with a PhD student to collect a large scale of out-of-distribution datasets.
- Collaborate with a research fellow to implement algorithms aimed at enhancing machine intelligence through compositionality.
- Apply developed algorithms to real-world applications with sparse data.

### Job Requirements:

- Bachelor's degree in computer science, software engineering, mathematics, or a related field.
- Background in machine learning.
- Proficiency in programming languages such as Python, and experience with machine learning libraries (e.g., TensorFlow, PyTorch).
- Excellent problem-solving skills and ability to work as part of a team.
- Passion for applying machine learning algorithms to real-world problems, particularly in domains with limited data.
- Effective communication skills and ability to convey complex technical concepts to both technical and non-technical stakeholders.
