ready researchers with the ability to tackle new challenges in chemicals manufacturing, healthcare, energy, food, and other important sectors.

The College of Science seeks a diverse and inclusive workforce and is committed to equality of opportunity. We welcome applications from all and recruit on the basis of merit, regardless of age, race, gender, religion, marital status and family responsibilities, or disability.

Key Responsibilities:

- Focus on the NHC catalyzed rapid synthesis of functional products
- Designing and synthesizing catalysts and other molecules, as well as planning and executing chemical reactions, alongside conducting mechanistic studies
- Designing and synthesizing potentially bioactive molecules, and conducting bioactivity and mechanistic studies (with collaborators when needed)
- Responsible for other research and laboratory duties as assigned by the Principal Investigator

Job Requirements:

- Hold a bachelor's degree in chemistry or a closely related field with a focus on organic synthesis, new methodology development, and the synthesis and biological activity evaluation of functional small molecules.
- Demonstrate a record of successful research in the aforementioned areas, including a history of publications and other related achievements in scientific journals and conferences.
- Showcase proficiency in experimental design, data analysis.

We regret that only shortlisted candidates will be notified.
